# WELCOME MESSAGE FROM THE ORGANISING COMMITTEE

ASIA PACIFIC  
NEUROCRITICAL CARE  
CONFERENCE 2026

Dear Friends and Colleagues,

On behalf of the Organising Committee, we are pleased to invite you to the Asia Pacific Neurocritical Care Conference (APNCC) 2026, which will be held from 3 - 5 July 2026 at the St. Giles Wembley Hotel in Penang, Malaysia. This event is proudly organised by the Malaysian Society of Neuroanaesthesiology and Neurocritical Care (MSNACC), in collaboration with the Neurocritical Care Society (NCS) and the Pediatric Acute & Critical Care Medicine Asian Network (PACCMAN).

Building on the success of the Asia Pacific Neurocritical Care Conference (APNCC) 2024, which took place from 28 - 30 June 2024 and welcomed over 400 attendees from more than 21 countries, we are delighted to announce the return of this premier event in 2026. APNCC 2026 will remain the only conference in Malaysia—and possibly the region—fully dedicated to both adult and paediatric neurocritical care.

By fostering knowledge exchange and collaboration among local and international multidisciplinary professionals, the conference aims to advance the care of patients facing life-threatening neurological and neurosurgical conditions. Ultimately, our shared goal is to improve outcomes for both adult and paediatric patients in neurocritical care settings.

We look forward to welcoming you to what promises to be a rewarding and enriching experience. While you are here, we also encourage you to explore the vibrant sights, sounds, and flavours of Penang. As a UNESCO World Heritage Site, Penang offers a rich blend of history, culture, and architecture—from charming colonial-era buildings and centuries-old temples to bustling heritage streets. There is truly something for everyone in this remarkable destination.

We look forward to seeing you!

Organising Chairpersons,

**Cheah Saw Kian**

Consultant Anaesthesiologist & Intensivist  
Hospital Canselor Tuanku Muhriz  
Universiti Kebangsaan Malaysia  
Malaysia

**Pon Kah Min**

Consultant Paediatric Intensivist  
Penang Hospital  
Malaysia

# WELCOME MESSAGE FROM THE SCIENTIFIC CHAIR

ASIA PACIFIC  
NEUROCRITICAL CARE  
CONFERENCE 2026

Dear Colleagues,

As the Scientific Chairperson for the Asia Pacific Neurocritical Care Conference (APNCC) 2026, I am pleased to invite you to join us in Penang, Malaysia, from 3 - 5 July 2026.

The Scientific Committee for this third edition of the APNCC is developing a programme that offers a strong balance of cutting-edge, thought-provoking, and clinically relevant topics.

We are proud to present some of the world's leaders in adult and paediatric neurocritical care, who will be joining us from across the Asia-Pacific, Europe, and North America regions.

Nestled in the heart of Georgetown, APNCC 2026 will offer a unique opportunity to explore the rich heritage of this enchanting city while delving into the latest advancements in neurocritical care.

Warmest regards,

**Lee Jan Hau**

Deputy Chairperson  
Pediatric Acute & Critical Care Medicine Asian Network  
Senior Consultant Paediatric Intensivist  
KK Women's and Children's Hospital  
Singapore

# ABOUT ASIA PACIFIC NEUROCRITICAL CARE CONFERENCE (APNCC) 2026

ASIA PACIFIC  
NEUROCRITICAL CARE  
CONFERENCE 2026

There is a growing need to meet the increasing demand for the care of critically ill patients with neurological and neurosurgical conditions. To our knowledge, the Asia Pacific Neurocritical Care Conference (APNCC) 2026 is the only conference in Malaysia—and possibly in the region—fully dedicated to neurocritical care for both adult and paediatric populations.

As such, APNCC 2026 is thoughtfully crafted with topics related to current and emerging trends in neurocritical care. To achieve this, the conference has brought together local experts and internationally renowned speakers on this platform to share their knowledge and experiences.

The conference has also partnered with local and regional biomedical industries to showcase the latest products and services relevant to neurocritical care and beneficial to patients with neurological conditions.

Hence, healthcare providers from multiple disciplines, neuroscience researchers, and policymakers involved in neurocritical care can congregate to learn, share, and establish networks with one another.

## Malaysian Society of Neuroanaesthesiology and Neurocritical Care (MSNACC)

There is an emerging number of anaesthesiologists with special interest in perioperative neurosciences from public, private and university hospitals in Malaysia. This subsequently catalyses the formation of Malaysian Society of Neuroanaesthesiology and Neurocritical Care (MSNACC) on 28 May 2021. The MSNACC is a non-profitable, self-generating professional body that remains very close in affiliation with the College of Anaesthesiologists, Academy of Medicine of Malaysia. Through its small but growing number of members, MSNACC aims to facilitate educational activities and development of guidelines on neuroanaesthesiology and neurocritical care in Malaysia. MSNACC also organises educational programme, formal attachments, workshops, international and national conferences and local training platforms, all for the betterment of perioperative neurosciences in Malaysia.

## COLLABORATING SOCIETIES

### Neurocritical Care Society

The Neurocritical Care Society (NCS) is proud to be the only professional society representing multi-disciplinary teams of neurocritical care providers around the world whose mission is to improve outcomes for patients with life-threatening neurological illnesses.

### Pediatric Acute & Critical Care Medicine Asian Network (PACCMAN)

The Pediatric Acute & Critical Care Medicine Asian Network (PACCMAN) is a collaborative research network formed in 2015 by pediatric intensive care providers. Currently, pediatric intensive care research is inadequate and poorly coordinated in Asia due to variations in clinical practice, institutional systems and resources. With conditions like sepsis, ARDS and myocarditis which carry high mortality rates, the scarcity of trends and research in this area underscores the need for collaboration and good quality interventional trials. The primary aim of PACCMAN is to promote collaboration by bringing together individuals to share experience and develop best practices for this diverse region.

## Organising Chairpersons

**Cheah Saw Kian**

Consultant Anaesthesiologist & Intensivist  
Hospital Canselor Tuanku Muhriz  
Universiti Kebangsaan Malaysia  
Malaysia

**Pon Kah Min**

Consultant Paediatric Intensivist  
Penang Hospital  
Malaysia

## Scientific Chair

**Lee Jan Hau**

Deputy Chairperson  
Paediatric Acute & Critical Care Medicine Asian Network  
Senior Consultant Paediatric Intensivist  
KK Women's and Children's Hospital  
Singapore

## Scientific Committee Members for Adult Track

**Jose I Suarez**

The Johns Hopkins University  
School of Medicine  
United States

**Will Loh**

National University Hospital  
Singapore

**Cheah Saw Kian**

National University of Malaysia  
Malaysia

**Peter Tan**

Miri Hospital  
Malaysia

## Scientific Committee Members for Paediatric Track

**Chor Yek Kee**

Sarawak General Hospital  
Malaysia

**Pon Kah Min**

Penang Hospital  
Malaysia

**Olive Lee**

Sunway Medical Centre, Kuala Lumpur  
Malaysia

# GENERAL INFORMATION

## Date

3 – 5 July 2026

## Country

Penang, Malaysia

## Venue

St. Giles Wembley Hotel  
183, Jalan Magazine  
10300 George Town  
Penang, Malaysia

## E-Certificate of Attendance

E-Certificate of attendance will be sent via email 2 weeks after the conference.

## E-Badge

All delegates are required to use their e-badge for access throughout the event. Please ensure your e-badge is downloaded and ready for scanning at registration and session entrances. Kindly keep it accessible on your mobile device at all times for a smooth and efficient experience.

## Exhibition Booth & Poster Panel Display

Both Exhibition Booths and Poster Panel Display are located in Concourse A, Foyer area.

## Time Zone

Sarawak, Malaysia is 8 hours ahead of Greenwich Mean Time (GMT +8) and does not observe daylight savings time.

## Language

The official language of the Conference is English. All abstract submissions and presentations must be submitted in English.

## Internet Access

Complimentary WIFI is available within the Conference venue

## Conference Managed By

Kenes MP Asia Pte Ltd  
20 Kallang Avenue,  
PICO Creative Centre Level 2  
Singapore 339411

## Liability and Personal Insurance

The Conference Secretariat and organisers cannot accept liability for personal accidents or loss of/damage to private property of participants, either during or indirectly arising from the Conference.

We recommend that all participants take out personal travel and health insurance for the trip.

## Transportation

There are other alternative transportation options, platforms like Grab and Maxim.

## Social Media

Stay up-to-date with the latest conference news and updates by following us on social media. Click on the social media icons to access our official pages where we share real-time information, announcements, and highlights from the event.

POSTER PRESENTATION | 3 - 5 JULY 2026

Abstract Topic	Full Name	Abstract ID	Abstract Title
Acute Inflammatory Central Nervous System Conditions and Neuromuscular Disorders	Cuong Nhat Le	APNCCPOSTER-0011	Complete Recovery Following Targeted Temperature Management and High-Dose Methylprednisolone in Influenza-Associated Necrotising Encephalitis: A Case Report
Brain-Multiorgan Crosstalk	Kamajaya Mulyana	EI-0017	Paediatric Paroxysmal Sympathetic Hyperactivity (PSH) with Dystonia: A Case Report and Review of Multimodal Management
Central Nervous System Infections	Hermansyah	APNCCPOSTER-0008	General Anaesthesia and Scalp Block for Craniotomy due to Cerebral Abscess in an Uncorrected Tetralogy of Fallot Patient: A Case Report and Literature Review
Multimodal Neuromonitoring	Shiva Priya Kandukuri	EI-0007	Transcranial Doppler as a Dual Diagnostic Tool in Subarachnoid Haemorrhage from Mycotic Aneurysm Secondary to Infective Endocarditis: A Case Report
Perioperative Brain Health	Umadevi Manyam	EI-0005	Dexmedetomidine and Surgical Blood Loss in Intracranial Meningioma Resection: A Randomised Controlled Trial

# ACCEPTED ABSTRACTS

PHYSICAL POSTER DISPLAY | 3 – 5 JULY 2026

ASIA PACIFIC  
NEUROCRITICAL CARE  
CONFERENCE 2026

Abstract Topic	Full Name	Abstract ID	Abstract Title
Acute Inflammatory Central Nervous System Conditions and Neuromuscular Disorders	Yu Suet Ying Judianna	EI-0013	Monitoring of Diaphragmatic Recovery in Myasthenic Crisis Using Continuous NAVA-Derived Diaphragmatic Electrical Activity
Artificial Intelligence in Neurocritical Care	Sharath Krishnaswami	EI-0004	Understanding the Impact of Anaesthesia on Brain Connectivity Networks
Brain-Multiorgan Crosstalk	Patrick B. Calauan	EI-0022	A Physiology-Driven Staged Neuro-Obstetric Management of Intracranial Mass in Late Pregnancy: Immediate Postpartum Craniotomy Following Neuro-Protective Caesarean Delivery
	Zhenghao Jin	APNCCORAL-0004	Ketamine Alleviated Blood-Brain Barrier Damage and Microglia Over-Activation Induced by SIRS via Restricting Caecum Damage and HMGB1 Release
	Alyza Valerie Yabres	APNCCPOSTER-0003	Neurogenic Autonomic Instability during Decompressive Craniectomy for Malignant Bilateral Middle Cerebral Artery Infarct Complicated by Unstable Tachyarrhythmia: A Case Report
Central Nervous System Infections	Ng Yean Joo	APNCCPOSTER-0012	Human Herpesvirus-6 Associated Acute Febrile Encephalopathy: The Culprit or an Innocent Bystander?
	Hapsari Widyaningtiar	APNCCPOSTER-0004	Typhoid Toxic Encephalopathy in the Neurocritical Management – A Case Report
	Derrick Lee Chuen Yew	EI-0009	A Rare Reality: A Case Report of Japanese Encephalitis
Multimodal Neuromonitoring	Loh Li Sen	EI-0002	Neuromonitoring Prevalence Analysis - Conventional Versus Advanced Modalities in Acute Brain Injury (NEURO-PACT): A Retrospective Observational Study
	Zhenghao Jin	APNCCORAL-0005	Visualised Difficult Airway Management in Special Position Combined with Fast-Track Anaesthesia Strategy for Craniocerebral Tumour Resection with Intraoperative Awakening Anaesthesia: A Case Report
	Igan Rollan C. Caluscusin	EI-0014	Intraoperative Seizures during Brain Tumour Surgery with Intraoperative Neuromonitoring (IONM); A Case Report
Paediatric Neurocritical Care and Postoperative Care of Paediatric Neurosurgical Patients	Lee Chiu Xian	APNCCPOSTER-0005	Transforming the Last Breath into the First Breath. Thiamine Responsive Acute Infantile Encephalopathy - Case Series
	Yeoh Si Ling	EI-0019	Management Practices and Short-term Functional Outcomes in Moderate-to-Severe Paediatric Traumatic Brain Injury: A Single-Centre PICU Study
Perioperative Brain Health	Shiva Priya Kandukuri	EI-0008	Change in Pulsatility Index on Cognitive Stimulation as a Predictor of Early Postoperative Cognitive Dysfunction in Elderly Patients Undergoing Spine Surgery: A Preliminary Study
Point-of-Care Ultrasound in Neurocritical Care	Ronald Chandrar	APNCCPOSTER-0009	Early Detection of Sepsis-Associated Encephalopathy Using Transcranial Doppler in a 6-Month-Old Infant During Treatment: A Case Report

# ACCEPTED ABSTRACTS

PHYSICAL POSTER DISPLAY | 3 – 5 JULY 2026

Abstract Topic	Full Name	Abstract ID	Abstract Title
Research, Quality and Safety in Neurocritical Care	Gui Sha Ron	EI-0021	Reducing Ventilator-Associated Event Rates among Mechanically Ventilated Patients in a Neurosurgical and Surgical Intensive Care Unit through Standardisation of a Ventilator-Associated Pneumonia Bundle: A Best Practice Implementation Project
Stroke and Aneurysmal Subarachnoid Haemorrhage	Zin Wai Htun	APNCCPOSTER-0002	Understanding the Impact of Anaesthesia on Brain Connectivity Networks
	Carlos Miguel Gulapa	APNCCPOSTER-0010	Chronic Headache in an Elderly Patient Revealing Superior Sagittal Sinus Thrombosis: Successful Endovascular Treatment with Embolectomy
	Syeda Kashfi Qadri	APNCCPOSTER-0013	Be FAST in Stroke - An Acute Stroke Activation Protocol
Stroke and Aneurysmal Subarachnoid Haemorrhage	Yen Yun Chong	APNCCPOSTER-0014	Characteristics and Outcomes of Paediatric Traumatic Brain Injury (TBI) Due to Accidental (AT) Versus Non-accidental Trauma (NAT): A Retrospective Cohort Study
	Sankho Choudhury	EI-0018	Comparison of Ketofol Versus Sevoflurane on Brain Relaxation in Patients with Severe Traumatic Brain Injury: A Prospective Randomised Control Trial
	Ryusuke Oyagi	APNCCORAL-0010	Comparison of GCS, GCS-P, FOUR, and RTS Score as Predictors of ICU Length of Stay and Mortality Rate of Patients with Traumatic Brain Injuries in the ICU

## 4U TECH

4U-Tech Corporation was established in 2000 to provide Biomedical Engineering Technology Solutions. We held a service contract with Hospital Pusrawi from 2000 to 2009 and have since signed maintenance contracts with several private hospitals on a project basis.

In 2009, we diversified into medical equipment distribution and were appointed as the exclusive distributor for Löwenstein Medical in Malaysia, a partnership that continues successfully to this day. Over time, we have expanded our portfolio with additional reputable brands to further strengthen our support for the Malaysian healthcare industry.

Löwenstein Medical specializes in advanced ventilation solutions for both homecare and hospital ventilation. To date, we have supplied more than 300 ICU ventilators across Malaysia. We also provide the best solution for MRI-compatible anesthesia systems with the Leon MRI, and currently, most MRI projects in Malaysia involve our expertise in completing comprehensive MRI room packages.

Meditech Medical (UK) complements our ventilator range by offering high-quality flowmeters and regulators, a strong combination that enables us to better fulfill our customers' needs.

Most recently, we expanded into operating room solutions through Inspital (Germany), offering customized designs for operating pendants, operating lights, and operating tables.

Today, we are proud to be among the leading medical equipment suppliers in Malaysia. With high-quality products and strong after-sales service and support, we aim to further strengthen our position as a market leader in our segment while continuously seeking innovative and advanced products to enhance our portfolio.

## Gemilang Asia Technology Sdn Bhd

Founded in 2004, Gemilang Asia Technology Sdn. Bhd. is a Malaysian firm that specialises in medical services and equipment. This organisation has established a reputation for dependability and excellence in the healthcare industry by concentrating on critical care, including neurocritical care.

At its core, Gemilang Asia Technology is driven by a simple belief: technology should empower clinicians, not complicate care. This company specialises in providing practical, dependable, and clinically relevant solutions that improve patient management in high-acuity settings like ICU's and neurocritical care units. Gemilang Asia Technology bridges the gap between innovation and real-world clinical needs by integrating innovative medical technologies and optimising workflow efficiency.

Neurocritical care is a field where seconds matter and decisions are often life-defining. Gemilang Asia Technology is closely aligned with their ambition of implementing recent clinical studies and the significance of technology that enables precision, monitoring, and rapid action to assist healthcare providers to guarantee that critical care environments are equipped with dependable solutions that support both patients and the significance careers. Beyond products, the company values relationships. Gemilang Asia Technology constantly refines its services in collaboration with intensivists, health carers, physicians, biomedical engineers, and hospital stakeholders to reflect the reality of modern healthcare.

Gemilang Asia Technology appreciates being included in APNCC 2026 and being a part of a movement whose ultimate goal is saving lives, improving patient recovery and shaping critical care across the region.

## Intersurgical

Intersurgical is a global designer, manufacturer and supplier of high quality medical devices for respiratory care and support. The extensive product range covers the four areas of airway management, anaesthesia, critical care and oxygen & aerosol therapy, designed for use in emergency prehospital settings, hospitals and home care. Our company and people have over 40 years' experience within this focussed area and through continuous improvement, we are able to provide solutions to meet changing clinical practice and the needs of our customers and their patients.

Within our Airway Management range we offer the i-gel® supraglottic airways family, Universal Stylet Bougie (UBS™), i-view™ video laryngoscope and the Litescope™ laryngoscope. The range also includes a large variety of catheter mounts and elbows for connecting the patient to the breathing system; along with an extensive range of breathing filters, HMEs and combined HMEF products for patient protection and humidification designed for use in anaesthesia and intensive care.

### Sustainable development

We are committed to lowering the carbon emissions and overall environmental impact of our products, activities and services through the implementation of an Environmental Management System certified to the international standard ISO 14001:2015. We follow this framework to establish and ensure a sustainable approach across the business and throughout the lifecycle of our products. We are committed to minimising the environmental impacts of the company's products, activities and services and to continually review and reduce our carbon emissions, with an aim to achieve Net Zero by 2045.

Visit our stand to meet our team from Intersurgical Malaysia and the Asian region, to see our product solutions first hand and to discuss your local respiratory care requirements.

Our goal is to provide best practice respiratory product solutions for both patients and clinicians, offering quality innovation and choice

## Menarini

Menarini is a leading biopharmaceutical company with a diverse portfolio of proprietary and partnered brands in a wide range of therapeutic areas, with a focus on key therapeutic fields, including Consumer Health, Dermatology, Allergy/Respiratory, Cardiovascular, Specialty Care, Men's Health, Pain Management and Central Nervous System. At Menarini, we are deeply passionate about our Brand Promise, "Invigorating Lives", based on our conviction to improve the quality of lives of people in our communities.

As a company, we aspire to empower healthier and happier living by advancing healthcare through our diverse therapeutic portfolio. In building strategic partnerships, we tap our deep expertise to offer our partners tailor-made solutions as well as access to key markets across Asia Pacific. At the same time, our dynamic omnichannel capabilities present multiple opportunities and avenues to expand our reach and realise the full potential of our portfolio.

For more information, please visit: [www.menarini.com/en-us.html](http://www.menarini.com/en-us.html)

## RAPHA MEDICAL

### Rapha Medical Sdn Bhd

Rapha Medical Sdn Bhd is a Malaysia-based company specializing in the distribution of medical devices and the provision of technical support services for healthcare facilities. Headquartered in Shah Alam, the company is committed to supporting the healthcare industry by delivering reliable medical equipment, quality products, and professional services that meet industry standards and the evolving needs of healthcare providers.

As a medical device distributor, Rapha Medical Sdn Bhd collaborates with trusted manufacturers and partners to supply a range of medical equipment and solutions to hospitals, clinics, and healthcare institutions. The company focuses on ensuring that healthcare providers have access to dependable and efficient medical technologies that support clinical performance, operational efficiency, and quality patient care.

In addition to its distribution capabilities, Rapha Medical Sdn Bhd provides comprehensive technical support services to ensure that medical equipment operates safely and efficiently. The company offers preventive maintenance services, including Planned Preventive Maintenance (PPM), as well as responsive breakdown support to minimize equipment downtime and maintain operational reliability within healthcare facilities. These services are carried out by trained technical personnel who understand the importance of maintaining optimal performance of medical equipment in critical healthcare environments.

With a strong emphasis on professionalism, service quality, and customer satisfaction, Rapha Medical Sdn Bhd works closely with healthcare providers to understand their operational requirements and deliver practical and efficient solutions. The company believes that reliable equipment and consistent technical support are essential components in supporting the effectiveness of modern healthcare systems.

Guided by its commitment to integrity, quality, and continuous improvement, Rapha Medical Sdn Bhd strives to build long-term partnerships with its clients, suppliers, and industry stakeholders. By combining medical device distribution with technical service expertise, the company aims to provide comprehensive support to the healthcare sector.

As the healthcare industry continues to evolve, Rapha Medical Sdn Bhd remains dedicated to contributing to the advancement of healthcare services through dependable medical technologies, professional maintenance services, and a strong commitment to operational excellence.

## ZOLL Medical Corporation

ZOLL Medical Corporation is a global medical technology company dedicated to improving patient outcomes through innovative solutions in resuscitation, emergency care, and critical care. Headquartered in the United States, ZOLL serves healthcare providers in more than 140 countries with a comprehensive portfolio of medical devices, software, and clinical support programs designed to enhance patient care and operational performance.

Recognized as a leader in resuscitation science, ZOLL develops technologies that support healthcare professionals across the continuum of care, including defibrillation, patient monitoring, mechanical CPR, data management, and critical care solutions. The company is committed to advancing evidence-based practices through continuous innovation, clinical education, and collaboration with healthcare institutions worldwide.

A key component of ZOLL's critical care portfolio is its Temperature Management Solutions, which support targeted temperature management (TTM) and fever control for critically ill patients. Through the Thermogard Platform, ZOLL offers both endovascular and surface temperature management technologies, enabling healthcare providers to select the most appropriate therapy based on patient needs and clinical workflows. The Thermogard XP and Thermogard HQ Systems utilize endovascular cooling technology and a closed-loop feedback mechanism to provide precise temperature control during cooling, maintenance, and rewarming phases of treatment. Complementing these systems, ZOLL's surface temperature management solutions provide non-invasive temperature control options while maintaining the same focus on accuracy, consistency, and ease of use.

In addition, ZOLL partners with leading innovators such as BrainCool to offer advanced surface temperature management solutions, further expanding the range of options available for targeted temperature management and fever control in critical care settings. Together, these technologies support healthcare providers in delivering evidence-based temperature management tailored to diverse patient populations and clinical requirements. Beyond technology, ZOLL provides comprehensive clinical education, implementation support, and technical services to help healthcare facilities successfully integrate temperature management programs into daily practice. By combining innovative technology with strong clinical support, ZOLL helps healthcare providers deliver high-quality care and improve outcomes for patients requiring advanced critical care interventions.

Through its commitment to innovation, clinical excellence, and patient-centered care, ZOLL Medical Corporation continues to support healthcare professionals worldwide in delivering life-saving and outcome-focused treatment.
